PROFESSIONAL SUMMARY

Aspiring Data Scientist and Java Developer with experience in IoT and full-stack projects. I focus on analyzing and preprocessing data to build projects and solve real-world problems.

EDUCATION

Master of Computer Applications, Goa Business School

Jun 2025 – Present | Taleigao, North Goa

- CGPA: 7.85

BSC in Computer Science, Dhempe College Of Arts and Science

Jun 2023 – May 2025 | Miramar, Panjim

- CGPA: 7.35

SKILLS

Programming Languages: Java, SQL, Python

Data Science: Data Analysis, Data Preprocessing, LangChain, Machine Learning

Frameworks & Libraries: Pandas, NumPy, Streamlit, React, Express.js

Database and Tools: Git/GitHub, Linux, Google Colab, MongoDB, MySQL, VsCode

EXPERIENCE

Artisan's Canvas 🔗, *Freelance Web Developer*

Nov 2025 – Dec 2025 | Remote

- Designed and deployed a responsive web application with a custom inquiry workflow, resulting in a **30% increase** in digital inquiries in the first month.
- Enhanced user engagement and trust by implementing a dynamic review system and replacing fixed pricing with a requirement-based quote feature.

PROJECTS

Natural Language to SQL 🔗

Mar 2026 – Apr 2026

- Co-developed a full-stack AI application leveraging **Llama models (Groq/Ollama)** to translate natural language into executable **SQL**, offering a choice between high-speed cloud processing and secure, private offline execution.
- Engineered a robust backend architecture with **Role-Based Access Control (RBAC)**, real-time **MySQL** query execution, and a comprehensive query history system to ensure efficient data management.

Fish Disease Detection & Identification 🔗

Mar 2026 – Apr 2026

- Co-Engineered a **computer vision** pipeline integrating four CNN architectures (**EfficientNet, DenseNet, ResNet, and MobileNet**) for multi-class image classification.
- Deployed a **FastAPI** web app with an AI summarization engine to generate concise diagnostic reports, translating complex symptoms into actionable, immediate care steps for non-expert farmers.

Abstracts- ResearchHub 🔗

Jan 2026 – Mar 2026

- Engineered a secure full-stack academic platform (**React, Node.js, MongoDB, Firebase**) with a state-preserving UI, integrating the **Semantic Scholar API** to query and organize millions of research papers.
- Built a personalized recommendation engine using parallel API fetching across 71 domains, and developed an **AI chat** interface to summarize abstracts, explain concepts, and suggest relevant research.
- Designed custom project workspaces and a centralized document management system, allowing users to upload PDFs, **track reading progress**, and organize tailored research libraries.

ACHIEVEMENTS

Finished as Top 5 Team Finalist, Solve for Goa Hackathon

Feb 2026

- For addressing the Fair Share Water Audit problem statement

Finalist & Presenter, Converge 2.0 Academia Industry Summit

Mar 2025

- Selected to present academic project "AquaFeeder" at the DHE & GSHEC Summit, Raj Bhavan, Goa.
